

APPLICATION FORM
REGISTRATION AS AN AUTHORISED LP GAS PRACTITIONER WITH SAQCCGAS
PROCEDURE FOR SAQCC GAS REGISTRATION

Having completed the required theory course for a particular type of installation, Basic Training, Intermediate Training, Advanced Training, or Automotive Training, you now need to register as a gas practitioner in one of the categories listed below.

How is this registration obtained?

Firstly you need to obtain a TEMPORARY REGISTRATION NUMBER. This number will be issued to you from the registration office at the LP Gas Safety Association after completing an application form. A fee of **R340.00** is required on application for a TEMPORARY REGISTRATION NUMBER.

Application Form

The application form must be completed and returned to our office together with three (3) passport photographs, certified copy ID, Progress Report. A Temporary Number will then be issued.

Registration Fee:

The registration fee will only be payable on your approval by the Committee.

PRACTITIONER TYPE	REGISTRATION PERIOD	FEE
<i>Domestic Practitioner</i> <i>Domestic Specialist</i> <i>Commercial Practitioner</i> <i>Specialist</i> <i>Industrial Practitioner</i> <i>Specialist</i> <i>Automotive Practitioner</i>	3 Years	R1,824 (VAT Inclusive) Applicable for Period:- 1/3/ 2014 – 28/2/2015

Please note that we will notify you when you are approved then you can make the payment! See below the breakdown of the registration requirements:

Auto Conversions: Candidates wishing to register as Automotive Installers must indicate which level of installation they participate in e.g. If petrol driven carburetor motor vehicles are converted then the applicant must indicate Carburetor conversion. Where applicants are converting fuel injection vehicles they must apply under the Specialist category as Auto Conversion Specialist Fuel Injection.

Domestic Practitioners: Domestic Practitioners are those persons who carry out installations of Domestic appliances served by not more than 5 on 5 off LPGas vapour outlet cylinders of which only one is in service at any one time. You are required to complete ten (10) installations of which five (5) are submitted in a portfolio of evidence.

Commercial Practitioners: Commercial Practitioners are those persons who carry out installations on Commercial appliances and equipment as limited to the requirements of SANS 10087-1 and SANS 10087-7. There are 2 categories for Commercial installers. "Vapour only" and "Liquid and Vapor". Please confirm your required scope on registration.

Industrial Practitioners: Industrial Practitioners are those persons who carry out Industrial installations, repairing and inspecting appliances and equipment for industry, bulk road and rail carriers and any installation drawing LPGas from a bulk supply vessel over 1000 kilograms stored capacity as given in the requirements of SANS 10087-3. You are required to do three (3) Industrial installations.

APPLICATION FORM
REGISTRATION AS AN AUTHORISED LP GAS PRACTITIONER WITH
SAQCCGAS Installation Evaluation Criteria:

Portfolio of Evidence of Practical Work

Once you have completed ten (10) installations (to the satisfaction of your mentor/inspector and/ or fire department, where applicable), five (5) installations must be forwarded to the Association, with the necessary supporting documentation, as well as colour photographs of each installation, presented in an organised, clear manner.

Please Note: Only Practitioners who have completed and submitted all the documentation to the LPGSASA will have their portfolios forwarded to the committee for registration.

On receipt of all documentation and the approval of the ITCC, you will then be registered as a Practitioner with the SAQCC (Gas) and will be issued with a card and a permanent QCC number. This card will have an expiry date and is subject to renewal, every three (3) years.

Failure to re-register will mean that you, as an installer, will be working outside of the law and in terms of the OHS Act can be severely penalised.

Why do you need a Temporary Number?

This number will enable you to work as a practitioner under a registered practitioner or mentor. This registered practitioner can be your mentor or you can have a mentor appointed to you by the Association if you cannot find a registered practitioner to mentor you. Your mentor shall have at least eighteen (18) months gas experience or be from a higher grade (for example, a commercial practitioner can mentor a domestic practitioner).

What is an approved Practitioner/Mentor and what role does he/she play in your attaining registration?

- a) He must physically check and sign off all of your work to show that you are competent to do an installation. This installation shall be done according to the requirements laid down in the relevant SABS standards.
- b) Sign only for work personally supervised through direct supervision.
- c) He takes full responsibility for ensuring your work is done according to the relevant SABS standards
- d) Please note the Occupational Health and Safety Act (Act 83 of 1993), states "No person shall install a fixed appliance, equipment or system for gas fuels as contemplated in sub-regulation (2), unless such a person is the holder of a certificate of registration issued by an organization approved by the chief inspector."

The Temporary registration fee includes a one (1) year membership to the Association and the cost of the Temporary registration card.

Where the Association is used as a mentor/inspector a charge of at least R250.00 plus VAT per installation inspected shall be levied. A traveling cost will be charged at R6, 64 per kilometer.
