

SAQCC GAS

South African Qualification and Certification Committee

Who is SAQCC Gas?

The South African Qualification and Certification Committee for Gas (SAQCC Gas) is a body acting on behalf of the Department of Employment and Labour to register Gas Practitioners (Installers) within South Africa.

SAQCC Gas was formed by the four (4) Member Gas Associations to establish a central database of registered Gas Practitioners in terms of the relevant legislation, namely the Pressure Equipment Regulations (PER).

THINK SAFE, BE SAFE! USE A REGISTERED GAS PRACTITIONER!

Are You Using Gas at Your Home or Business?

Are you aware of the legal and safety requirements?

Regulation states,

“No person shall install or remove a gas appliance, gas system or a gas reticulation system unless such person is authorised to do so”

employment & labour

Department:
Employment and Labour
REPUBLIC OF SOUTH AFRICA

Are you aware that your insurance company requires your gas installation to be compliant ?

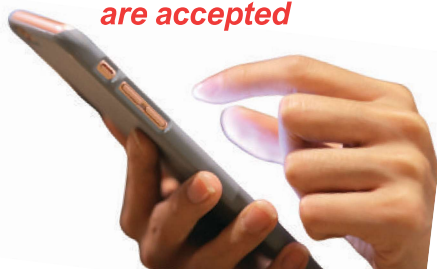

Certificate of Conformity (CoC)

On completion of the installation, repair, modification and/or maintenance of a gas appliance, system, or airconditioner/refrigeration unit, a Certificate of Conformity (CoC) must be issued by the Gas Practitioner.

If gas work is not carried out in terms of the Pressure Equipment Regulations and relevant Health and Safety Standards, it will be deemed to be an illegal and unsafe installation. This can lead to several potential problems including loss of insurance cover.

The CoC is valid for as long as no work has been done on the existing gas system since the original CoC was issued. If any work has been done post the original CoC, a new CoC must be issued, which supersedes the previous one.

Say no to paper CoCs. Only electronic CoCs are accepted

Where to find a Gas Practitioner ?

www.saqccgas.co.za Q

You can search by:

Province, SAQCC Gas Registration Number, Surname, Town & Suburb or Company

Gas Practitioners have been trained and proven competent in their specific field, meaning they are capable of undertaking gas installations such that they are compliant with the relevant legislation and are therefore deemed to be safe.

It's the only way to ensure that your gas installation is compliant, safe, and fit for use. It is therefore imperative that only a registered Gas Practitioner is appointed to work on your gas system.

Gas Practitioner's qualification can be viewed on the Electronic CoC App as a digital card or on the SAQCC Gas website (database), which shows the type of installation the practitioner is qualified to undertake.

Are you working on a Gas System ?

The following Gas Associations have set qualifications and assessment criteria for registration within the scope of work covered in each of the gas sectors.

Please contact the associations for more information:
